

ABDUN-NUR D. KADIL

CIVIL ENGINEER | SAFETY OFFICER 2

 kadilabdunnur15@gmail.com

 +639 35119 0497

 www.linkedin.com/in/abdun-nur-kadil

 Zamboanga City, Philippines

WORK EXPERIENCE

PHILIPPINE COCONUT AUTHORITY – ZAMBOANGA RESEARCH CENTER

Jun 2025 - Present

San Ramon - Talisayan, Zamboanga City

Project Technical Assistant II

- Responsible for preparing manpower schedules and creating technical drawings to support project activities. Oversees and monitors all structural renovations under the NFPDD Division, ensuring compliance with project standards and timelines. Under the PCAARRD Project, assigned to simulate machinery designed to assist coconut farmers, conduct machine testing, and prepare comprehensive technical reports.

BENDIMIL CONSTRUCTION AND DEVELOPMENT CORPORATION (INTERNSHIP)

2023

CONSTRUCTION OF ZCDDRMO AND COMMAND CENTER.

Upper Cabatangan, Zamboanga City

Assistant Site Engineer

- Conducting a site survey to know the land elevation around the DRRMO building. The collected data will then be plotted on **CAD software** and will be used for preparation for the cut and-fill activity of the land.
- Cost Estimates, rebar scheduling and Activity inspection.

CONSTRUCTION OF BY-PASS AND DIVERSION ROADS (WIDENING OF SAN RAMON BRIDGE).

San Ramon, Zamboanga City

Assistant Site Engineer

- Activity inspection and conducting elevation check of abutment mat footing using **Total station** to verify alignment with the specified elevation in the approved plan.

EDUCATION

Bachelor of Science in Civil Engineering

Zamboanga City, Philippines

Western Mindanao State University

Aug 2019 - Oct 2024

- Major in Structural Engineering.
- Thesis/Capstone on "CAMIKNOW: Visualization and Data Base of Road crashes analysis web application for Zamboanga City Traffic Enforcement Unit".

Senior High School Education

Zamboanga City, Philippines

Recodo National High School

June 2017-April 2019

- With Honors

ADDITIONAL INFORMATION

- Languages:** English, Filipino
- Certifications:** Civil Service Passer - Professional Level

SKILL HIGHLIGHTS

- Proficient in *Auto CAD Software, Sketch Up, and Solidworks*
- Basic Knowledge in *STAAD connect* (Structural Analysis software)
- Basic Knowledge in Ansys Structures, *Structural and fluent analysis* (FEA software)
- Basic Computer Skills (Word, Excel, Powerpoint) and troubleshooting
- Project Estimates, *Planswift*
- Planning and Scheduling, *Primavera P6*

SEMINARS/TRAINING ATTENDED

- PlanSwift + Primavera P6 Online Training and Workshop, XSTRUCTURES - JULY 11-12, 2026
- Cost Estimate Masterclass, 16-hour live online training, April 27-30, 2026
- The World Coconut Congress (WCC) 2025, SMX Convention Center Manila, September 24-26, 2025
- Intellectual Property (IP) Rights: Orientation and Basic Workshop, Western Mindanao State University, August 26-28, 2025
- 40 Hours Construction Occupation Safety and Health training Course with 2 Hours Training of Training TOT, June 8, 9, 15, 16, 2024.
- Organizer, Zamboanga Peninsula Civil Engineering Summit 2023 "AVANCE", Western Mindanao State University, November 25-26, 2023.
- Participant, UP NCTS organized by DOST "Supporting Walkability Transition", Via Zoom Webinar, April 13, 2023.
- Participant, UP Los Baños, Foresters' CPD Webinar Series 2 "Cities & Greens: Saving the Urban Green Spaces", April 04, 2023.
- Participant, PICE Los Baños Chapter "REINFORCE, Exploring software advancements in engineering design and analysis", Via Zoom Webinar, March 25, 2023.
- Participant, MIDAS GTS NX: Soil anchoring using slope stability method, Via Zoom Meeting, March 23, 2023.
- Organizer, Zamboanga Peninsula Civil Engineering Summit 2022 "UNBRACE", Via Zoom Meeting, November 25-26, 2022.
- Participant, UP NCTS Webinar "Technologies/infrastructures for public transportation smart mobility", Via Zoom Meeting, February 11, 2022.
- English Proficiency in International Competitiveness (EPIC), 2022.
- Organizer, Zamboanga Peninsula Civil Engineering Summit 2021, Via Zoom Meeting, November 19-20, 2021.
- Participant, UP Los Baños, "SkillUp 2k21: Expanding Project Management Skill Set through MS OFFICE", Via Zoom Meeting, October 23,30, 2021.
- Participant, National Civil Engineering Summit 2021 "Innovation without limits", Via Zoom Meeting, October 3, 2021.
- Participant, National Civil Engineering Summit 2021 "Innovation without limits", Via Zoom Meeting, September 26, 2021.
- Participant, Philippine Institute for Civil Engineers "Webinar on Disaster Resilience", Via Zoom Meeting, July 31, 2021.
- Participant, 2021 PICE Virtual Midyear National Convention and Technical Conference, Via Zoom Meeting, June 25-26, 2021.

STEEL DESIGN OF STUDENT COMPUTER CENTER - UNDERGRAD PROJECT

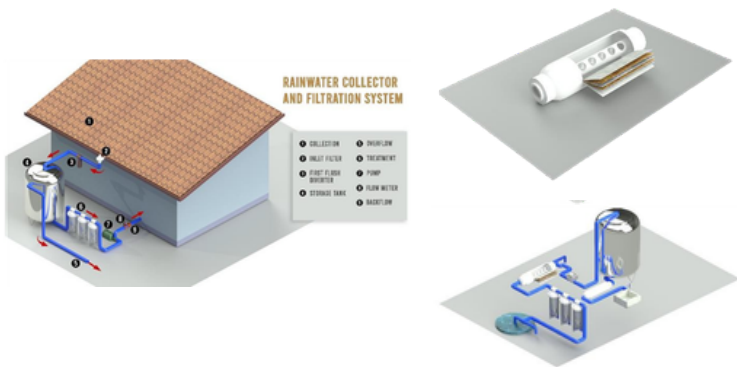

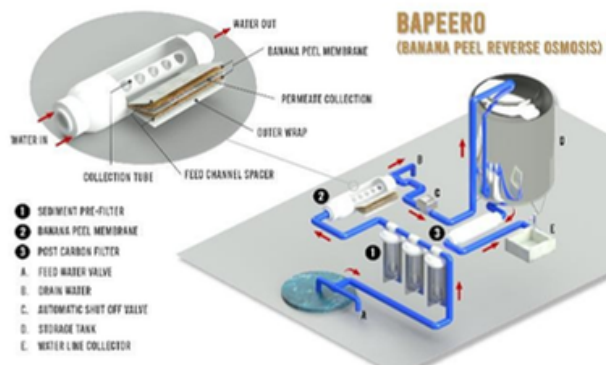

What?

- **Redesigning** a reinforced concrete (RC) structure into a **steel structure** for the Student Computer Center of Western Mindanao State University, ensuring that the new design meets structural performance requirements

How?

- The structure is analyzed using **STAAD.Pro's** advanced analysis to evaluate its performance under the specified load combinations
- Detailed results are obtained, including stress distributions, bending moments, shear forces, and displacement patterns throughout the entire structure

RAINWATER COLLECTOR AND FILTRATION SYSTEM - CASE STUDY FINALIST

What?

- Developed a rainwater collector and filtration system using banana peel reverse osmosis, recognized as a case study finalist at the UP Diliman National Civil Engineering Summit.

How?

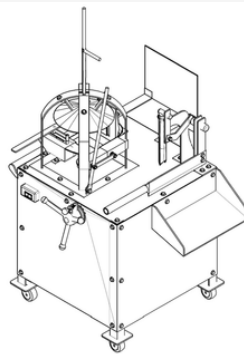

- Created the design using CAD models—from layouting to rendering—to develop and present the complete system.

ROTARY BUKO TRIMMER AND PEELER | PCA-ZRC

What?

- Developed a rotary buko trimmer and peeler by producing comprehensive **CAD models** and **technical drawings** required for machine fabrication.

How?

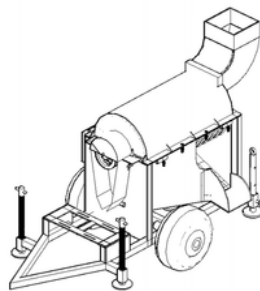

- Utilized **ANSYS CFD analysis** to simulate airflow, cutting dynamics, and overall operational performance, ensuring the machine's efficiency, safety, and reliability prior to fabrication.

MOBILE COCONUT HUSK DECORTICATING MACHINE | PCA-ZRC

What?

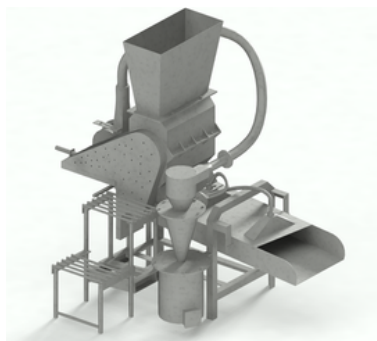

- Developed a mobile coconut husk decorticating machine by creating complete **CAD models**, **technical drawings**, and **design specifications** for fabrication.

How?

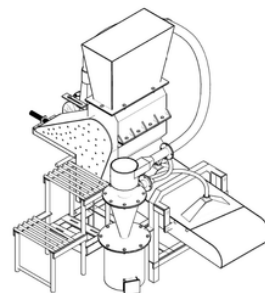

- Conducted **performance simulations** and mechanical assessments to evaluate fiber separation efficiency, machine mobility, and operational reliability before prototyping.

CHARCOAL PULVERIZER | PCA-ZRC

What?

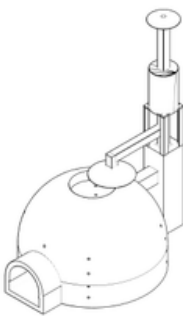

- Developed a charcoal pulverizer through detailed CAD modeling and the preparation of complete technical drawings required for fabrication.

How?

- Performed **mechanical evaluations** and **design simulations** to assess crushing efficiency, particle size output, and overall machine durability prior to construction.

CHARCOAL KILN | PCA-ZRC

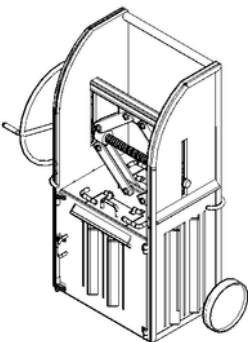

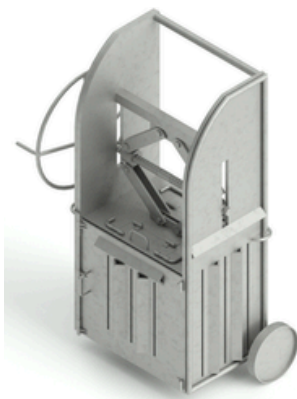

What?

- Developed a charcoal kiln by creating complete CAD models and technical drawings outlining the kiln's structure, components, and material specifications for fabrication.

How?

- Conducted thermal and combustion performance assessments to evaluate heat distribution, carbonization efficiency, and structural integrity, ensuring optimal operation before construction.

COIR BALING MACHINE | PCA-ZRC

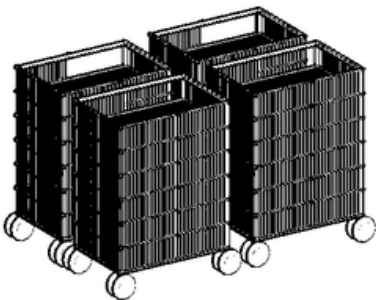

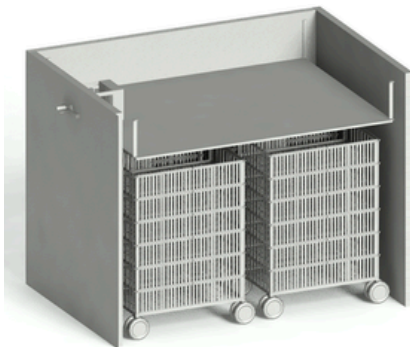

What?

- Developed a coir baling machine by producing comprehensive CAD models and technical drawings detailing the machine's framework, compression components, and fabrication requirements.

How?

- Performed mechanical and operational simulations to assess compression force, bale density, and system reliability, ensuring efficient baling performance prior to fabrication.

WHITE COPRA DRYER | PCA ZRC

What?

- Developed a white copra solar-powered dryer by producing detailed CAD models and technical drawings, highlighting the solar heating system, structural design, and fabrication specifications.

How?

- Performed thermal and airflow simulations to assess solar heat utilization, drying efficiency, and operational performance, ensuring effective and sustainable copra drying prior to fabrication.
